

June 24, 2024

I cannot believe it is the end of June and the 4th of July is right around the corner! We have so many exciting projects ongoing, building rooftops, rolling stock (trucks and railcars), machine maintenance, aircraft hangers in locations such as Williston, ND, Crestview, FL and Middletown, NY. SES is willing to go where the business takes us!

SES designed, furnished and installed the rigid rail system below for a regional bulk transportation company. This rigid rail system is supported by RoofSavers (yellow structures) anchored overhead to the existing roof purlins. In addition, this system was designed for confined space entry as well.

SES furnished and installed a series of tieback anchors for façade maintenance and window washing activities at a leading hotel chain. These tieback anchors had a "thru-bolt" connection and were pull tested (2,500 lbs. for three minutes) to ensure OSHA compliance.

HAVE A SAFE DAY!
